Install Trouble
Posted by jasonhillVDEQ - 2010/02/18 21:12

_____

Hi,

I have Arc9.0 with .net support enabled, Service Pack 3 installed, and .Net 1.1 installed. When I try to install AGWA 2.0 for Arc 9.0 at the very end (just when you think its almost finished loading) I get a message that says "Unknown Error (-1)" which stops the install. Any idea what could be causing the problem?

Thanks, Jason
